

Expression of Customized Proteins

Expression in CHO cells

Expression in E. coli

At the moment we are able to deliver amounts from a few μg up to 10 g

Proteins can be expressed with or without purification tags (His or GST)

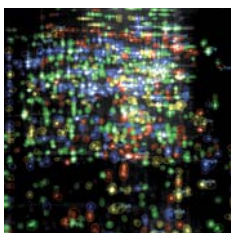

Recombinant proteins can be delivered freeze dried or in solution

Search for target proteins by 2 D electrophoresis
(evaluation on Delta2D, DECODON Greifswald)

Identification of target proteins by masspectroscopy and N-terminal sequencing.

Production of target proteins for test kits

Modification and production of target proteins
